## About OMANS

More Than 10 Years Experience  
To Global Supply of High Quality Valves

Yuhuan Dunda Valve Co., Ltd. was established in 2009, which is a company in mainland China specializing in producing various high-quality valves and plumbing products. Our products are widely used in under-floor heating systems, sanitary ware, and industrial pipelines. Our factory, located in Yuhuan, Zhejiang, covers an area of over 10,000 square meters with advanced production equipment and technical strength. We have an experienced R&D team dedicated to continuous innovation and improvement of our products to meet customer needs. Our products meet international standards and have passed ISO9001 quality management system certification.

Our valves and plumbing products are made of high-quality materials, possessing excellent performance and durability. We prioritize our customers and provide comprehensive services including technical support, after-sales service, and customized solutions.

Yuhuan Dunda Valve Co., Ltd. has established a good reputation and become a reliable brand for domestic and foreign customers. We will continue to strive to provide better products and services to our customers.

OMANS

PROFESSIONAL BRASS VALVE &  
BRASS FITTING MANUFACTURER

## PRODUCTION

Dunda Valves, Machined from solid brass, offer the highest quality and the most reliable connections

We have more than 150 sets of manufacturing equipment including hot forging machine, CNCs, multi-rotary CNCs, fitting automatic machinings, and 12 assemble production lines in total, in order to make quick response to market changes with excellent quality, minimized production cost and high efficiency

**PROFESSIONAL**  
Production Equipment

## POLISHING AND PROCESSING

Mechanical polishing is a grinding method that uses machine equipment for grinding. It can efficiently and quickly process workpieces while maintaining a certain degree of accuracy and surface quality.

In order to ensure high-performance products, we will carry out precision polishing processing to further improve the quality of its components. Prevent leakage, burrs, defective products, etc. Enable us to ensure unparalleled product quality.
